Re: *Supplemental Filing*
Certificate of Need Application for an Electronic Health Record Replacement Project

Dear Donna:

The enclosed documents are intended to supplement our initial filing of the Certificate of Need application for the replacement of the current electronic health records and related information technology systems ("EHRs") at UVM Medical Center and three of the UVM Health Network's other member hospitals with a unified EHR system (the "Project").

As noted on page 5 of the CON application, UVM Health Network retained Ponder & Co., an independent financial adviser, to review the projected financial impact of the Project, as reflected in a 10-year financial forecast for UVM Health Network and UVM Medical Center, and to provide its opinion as to the Project's financial feasibility. The Ponder opinion has now been completed and it is enclosed for your review.

If you have any questions concerning this supplemental filing or the other application materials, please do not hesitate to contact me.

Thank you.

Very truly yours,

Steven J. Klein, Esq.
Director of Legal Affairs & General Counsel
